Subject: COYOTE CONTROL	Control Code: 11.33

COYOTE CONTROL

The Agricultural Service Board will undertake a Coyote Control Program within its boundaries under the provisions of the Agricultural Pests Act.

Predation:

Upon receipt of a complaint for coyote predation, the Inspector will do a site investigation. If evidence suggests coyote predation, the Inspector at his discretion, and if requested by the landowner, issue a limited number of or set coyote control devices in accordance with guidelines as outlined by the Pest Control Branch of Alberta Agriculture.

Under no circumstances will toxicants be issued simply to reduce the number of coyotes present or because a producer notices coyotes hanging around stock.
