

The Premises Identification (PID) Program is used to track the location of animals in case of an health emergency occurrence, a public health emergency, or an emergency such as a natural disaster affecting animals and people. On January 1, 2009, regulations requiring premises identification became law as part of the Animal Health Act.

A “premises” means the area of land contained in a legal land description or identified by geo-referenced coordinates and is where recordable animals are bred, kept, raised, displayed, assembled or disposed of. “Recordable Animals” are animals from those species listed in the attached Premises Information Sheet for Animal Owners and Commingling Site Operators, Schedule A, Part I.

An owner of a recordable animal must apply for a premises identification account and at least one premises identification number within 30 days of assuming ownership of a recordable animal.

An operator of a “commingling site” shall obtain a premises identification account and at least one premises identification number for each commingling site operated by the operator within 30 days of assuming ownership of a “commingling site”. “Commingling Sites” include those listed in the attached Premises Information Sheet for Animal Owners and Commingling Site Operators, Schedule A, Part H.

For further details on the PID program, see the Traceability Premises Identification Regulation under the *Animal Health Act, S.A. 2007, C.A.-40.2*

This package contains:

PID Account Application Form (1 page)	- An application for a premises identification account must include the following information; <ul style="list-style-type: none"> • the Applicant’s name • the name of the business the Applicant will be operating, if any • the Applicant’s contact information during business hours and after business hours.
