

Section: A.S.B.	Page: Motion No.: Jan/03 #69/03
Subject: SEED CLEANING PLANT PROGRAM	Control Code: 11.41

PURPOSE OF SEED CLEANING PLANT PROGRAM

To assist and encourage farmers to use clean seed in all applications in order to minimize the spreading of weeds and enhance productivity of the land by providing good quality seed cleaning services to all customers, at competitive rates, without unreasonable delay and within the limitations of the facilities and equipment owned and the personnel available at any given time.

FUNCTION

1. To receive and accept only those unclean seeds which can be cleaned to an acceptable standard.
2. To guarantee that the seed delivered to the plant will be the same seed returned to the person who delivered it.
3. To remove as much of the undesirable seeds as possible from the main seeds delivered.
4. To provide clean and safe facilities and equipment for its employees and customers.
5. To establish seed cleaning rates.
6. To employ a competent Plant Manager, and determine his/her role and responsibilities in consultation with the Municipal Administrator and the Manager of Agricultural and Environmental Services.
7. To establish rates of pay for all Plant employees in consultation with the Municipal Administrator and the Manager of Agricultural and Environmental Services.
