

## ROADSIDE BACKSLOPING PROGRAM

**OBJECTIVE:** To encourage landowners with properties along existing roads to backslope the ditches. This will benefit both the landowner, which will get better land use and the County of St. Paul.

1. The landowner must apply prior to work commencing.
2. The Agricultural Fieldman or Assistant Agricultural Fieldman must inspect prior to work commencing and after the work is finalized.
3. The landowner must hire his own cat to do work.
4. The County will pay \$350.00/half mile of roadside, backsloped only upon approval by the Agricultural Fieldman.
5. Any disagreements in regards to a backsloping application, may be brought forward to the County Council.
