

Appendix IV. Road Corridor Plan

The map on the following page (Figure IV.1) shows the existing roads on the Sundance FMA area. The company has no plans to build any permanent LOC roads at this time. Any roads required for access to sequenced blocks will be temporary and will be reclaimed once harvesting and silvicultural operations are complete. All permanent roads are approved by the Lands Division of Alberta Sustainable Resource Development.

Figure IV.1 Current Road Density on the Sundance FMA Area (km/km²).
