

Pristine Canadian Bottled Glacier Water

We produce pristine Canadian bottled glacier water. Our water source comes from the Columbia Icefields just outside Banff National Park in Alberta. The water has a clean refreshing taste that boasts a pH level of approximately 8.

Our water plants are located in Edmonton and Calgary. They are GSFI-certified and were built in January of 2016 with state-of-the-art equipment. Our plants have the ability to produce 30,000 bottles per hour.

We can produce bottled water in the following sizes: 350 ml, 500 ml, 591 ml, 710 ml, 1L, 1.5L, 4L, 10L, 15L, 18.9L and 20L. We can ship water in containers that have a capacity of 24 pallets or 27,272 kgs.

We have the ability to produce branded or private label bottles (for a nominal onetime fee).

We are an expanding young company that can react to your needs in a professional matter.

All 4 Water

Planning to export to: China, Japan, Taiwan, India
