Quilting by Design

A favorite 4-H project that incorporates all the elements of design and fashion is the quilting project. Once established this project will very quickly become a favorite for students and you will find them lining up to take the project. The quilting by design course was divided into a series of small projects starting with a heart shaped pillow or a hanging welcome quilt. From their students could opt for larger projects and quilts.

As part of the 4-H club students toured the local nursing home and the parenting teen's program that runs in our area. It was a natural then for students to begin making lap quilts for the elderly or baby quilts for the new born.
