

To ensure best use of your time and efforts, choose topics that are relevant to your community.

**Remember, each community will have its own unique day camp and no one can determine what is right for the community better than the community itself.**

Complete the following worksheet to help identify key areas to address in your specific community.

## Community Project Worksheet

- What does the typical farm look like in the community? Is it mainly grain, beef or mixed?
- What are some of the previous farm safety incidents that occurred in your area? Were children involved in any of these incidents?
- What are the major challenges to teaching children about farm safety in your community?
- What farm safety and health events have taken place in the past? What ages of children were involved? What topics were covered?
- What farm safety and health education resources are available in the community (extension, school, business etc.)?

Topic Session Ideas (Ideas are endless)	Possible Presenters
