Green Certificate Student-Trainee Evaluation and Assessment Guidelines

Students participating in the Green Certificate Program have an opportunity to earn high school credits. The marks upon which these credits are based are suggested to be determined as follows:

100%	TOTAL
10%	Trainee Self Evaluation
10%	School Coordinator's Evaluation
10%	Farmer-Trainer Evaluation
70%	Certification Test Results

It is important that all parties be fair and reasonable in deciding what mark to submit. Please have each of the respective parties complete the following evaluation and submit all forms to you Green Certificate program coordinator prior to your next certification test. In each respective section, the evaluator is to place a mark on the line that they feel the student fairly and reasonably earned during the testing period. Then a specific two-digit number is to be entered after Mark =, e.g. if you marked between a 5 & 6 on the line then enter 55%.

Farmer-Trainer Evaluation

It is recommended that 10 % of a Green Certificate student trainee's graded mark come from a Farmer-Trainer evaluation. In determining the mark you are giving you may want to consider the trainee's dedication to the course, amount of initiative shown in gaining the knowledge and skills being tested, the effort you observed and general willingness of the trainee to observe, learn and accept you help and/or constructive criticism.

NOTE: Once the student's mark has been established, it is then converted from Green Certificate training periods into Alberta Education's course codes. Each school coordinator is responsible for submitting the course codes to Alberta Learning and its associated grade for each student.
