

Commercial Availability of Alberta Grown Crops

This chart is to be used as a general guide to show the quantity of Alberta commercial vegetable crops that are for sale. When availability changes during the month the chart will reflect this by using half-month intervals.

KEY:

- L = Limited (1 to 4 % of crop available)
- A = Average or regular supplies (>4 to 15% crop available)
- P = Peak (> 15 % of crop available)

Since the chart is based on an average crop season, climate differences, from year to year or between different regions, will determine whether crops are available sooner or later than indicated. The availability of a specific crop in any given year is also determined by demand and other factors.

ALBERTA GROWN CROPS													
Wholesale Market (Retail, Food Service)													
Vegetable	Type	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May
*Asparagus	White & Green	P A											A
