Subject:	ROADSIDE SEEDING	Control Code:	11.15

ROADSIDE SEEDING

The Agricultural Service Board will undertake a program of seeding backsloped roadsides as well as newly constructed roads and borrow pits. The Agricultural Fieldman's office will obtain locations of roads and borrow pits to be seeded from the County Public Works Department. The Public Works Department will supply the Fieldman with locations that require special mixes and the varieties required in those special mixes, otherwise all areas will be seeded with the standard roadside mix. The Fieldman, at his discretion, may supply an appropriate amount of grass seed to those farmers wishing to seed borrow pits and roadsides on their own initiative.
