## Expense Record

Value of horse at start of project year (A, Page 8)

\$

(J)

Month	Feed (C)	Project Related Costs (D)	Health (F)	Monthly Total
<b>Totals</b>				(K)

Value of horse at start of project year (J) + Total Expenses (K) = Total Project Expense (L)

$$\boxed{\phantom{000000}} \text{ (J)} + \boxed{\phantom{000000}} \text{ (K)} = \boxed{\phantom{000000}} \text{ (L)}$$

Total Project Expense (L) – Total Income (I) = Cost of taking on your project this year (M)

(a negative answer indicates a profit earned)

$$\boxed{\phantom{000000}} \text{ (L)} - \boxed{\phantom{000000}} \text{ (I)} = \boxed{\phantom{000000}} \text{ (M)}$$
