

THE Computer 1-2-3 Member Manual

Welcome to 4-H Computers 1-2-3. This manual has been set up in 3 levels to give you the chance to work through some mini and major projects:

- at your own speed,
- to improve your computer skills, and
- with your hardware (computer) and software (programs).

The mini projects are the exercises where you learn some of the really basic skills in programs like word processing, spreadsheets, drawing/painting, presentations and data bases.

It is important that you do the mini projects in the order that they are in the manual. Once you complete the mini projects and the major project from Level 1, you can move to Levels 2 and 3. Before starting any of the Level 4 Extended Computer Projects like HTML you need to complete the Computer 1-2-3 mini and major projects.

Each section of the manual has:
Skill Level

These are the sections, "Levels 1, 2 and 3", that you will work through. Some you will find very easy and complete quickly, others you will have to take more time to master!

Mini Projects

These are the exercises you will work on for Levels 1, 2 and 3. This usually means you need to work on the computer, but some involve other tasks you will need to complete like interviews and recording information.

Major Projects

You may do one that is in this manual or you can talk to your computer project leader about doing something completely different. Remember the project still needs to meet the Project Guides on page 67!

Remember to have fun, ask for help, challenge yourself and show your friends and family the different things you learn along the way.

The Table of Contents has lines for you to check off when you are done the mini and major projects. Have your computer project leader initial each one after you check off that you are done.

Completed

Table of Contents and Checklist

_____	1. Where in the World are Computers? In Your Community / Interviews	11
_____	2. Input – Processing – Storage - Output	13
	A. Hardware	
	B. Software you know how to use	
	C. The Plan	
	Planning the project	
	Thinking Process and the 5W's	
	Do the Project	
	Picture Plan	
	Your Own Project Plan	
	Planning the scoring	
	3. Mini Projects	
	Level 1 - Transitions	
_____	Using the Internet	22
	Basic Online Safety and Etiquette	
	My Internet Safety Plan	
	Searches	
	Safe Search Engines	
	Boolean Searching	
	Identifying website names	
	Communicating using email	
	How to Use Email	
	Viruses and Virus Hoaxes	
	"Cite the Site"	
	Copyright and Plagiarism	
	Learning the Software	
	Common Menu Bars	
_____	Level 1 Word Processing	32
_____	Mini Project 1 - Creating, Opening and Saving a document	
_____	Mini Project 2 - Adding, formatting, spell checking and deleting text	
_____	Mini Project 3 - Using Cut and paste	
_____	Level 1 Drawing/Painting	35
_____	Mini Project 1 - Creating, Opening and Saving a document	
_____	Mini Project 2 - Using the pens, brushes, eraser tools and the undo command.	
_____	Mini Project 3 - Using the copy and paste commands in a single image and between two different images.	

Level 1 Spreadsheets

37

- Mini Project 1 - Creating, Opening and Saving a document
- Mini Project 2 - Entering data and selecting cells
- Mini Project 3 - Editing worksheets, headers, rows, columns and cells
- Mini Project 4 - Creating graphs and charts

Level 1 Presentations

38

- Mini Project 1 - Opening, Creating and Saving a show
- Mini Project 2 - Adding, formatting, spell checking and deleting text
- Mini Project 3 - Using slide transitions and timing

Level 1 Major Project

40

Plan
Scoring
Input-Processing-Output

Completed

Level 2-Interface

LEVEL 2 Word Processing

44

- Mini Project 4 - Using Find & Replace
- Mini Project 5 - Inserting pictures
- Mini Project 6 - Inserting graphs and charts (objects)
- Mini Project 7 - Adding a document Password

LEVEL 2 Drawing/Painting

46

- Mini Project 3 - Using the polygon, rectangle, circle and eclipse tools
- Mini Project 4 - Inserting and formatting text, clip art, and charts.
- Mini Project 5 - Using style sheets and image alignment/attributes

LEVEL 2 Spreadsheets

47

- Mini Project 5 - Inserting objects and pictures
- Mini Project 6 - Adding a workbook password
- Mini Project 7 - Using formulas

LEVEL 2 Presentations

48

- Mini Project 4 - Inserting objects and pictures and Embedding objects and pictures
- Mini Project 5 - Inserting graphs and charts and Embedding graphs and charts
- Mini Project 6 - Creating new documents using the Templates/Wizards (Word) or Stationary/Assistants(Claris/AppleWorks)

Level 2 Databases

49

- Mini Project 1 - Determine layout and information to be stored
- Mini Project 2 - Setting up fields and field names
- Mini Project 3 - Formatting and saving a database
- Mini Project 4 - Enter data

Level 2 Major Project

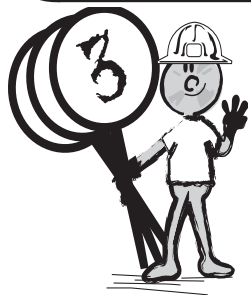

53

- Plan
- Scoring
- Input-Processing-Output

Completed

Level 3-eGAD
(Graphics, Applications, Design)

LEVEL 3 Word Processing		57
	Mini Project 8 -	Create new documents using the Templates/Wizards Stationary/Assistants
	Mini Project 9 -	Using a table of contents or index command
	Mini Project 10-	Using Hyperlinks
	Mini Project 11-	Saving your document as a web page

LEVEL 3-Drawing/Painting		58
Mini Project 6 -	Importing and modifying photographs or other scanned images using individual pixels	
Mini Project 7 -	Combining two or more images or photographs into a single image	
Mini Project 8 -	Save an image(s) in a variety of formats	

LEVEL 3 Spreadsheets		59
Mini Project 8 -	Creating pictures of cells, charts and objects	
Mini Project 9 -	Inserting and using Hyperlinks (Hotlinks)	
Mini Project 10-	Saving your Data as a web page	

LEVEL 3 Presentations		60
Mini Project 7 -	Adding music, sounds, videos, and animated GIF	
Mini Project 8 -	Creating animation	
Mini Project 9 -	Using Hyperlinks	
Mini Project 10-	Saving your document as a web page	

LEVEL 3 Database		61
Mini Project 5 -	Setting up a multi layout database	
Mini Project 6 -	Work in layout and list mode	
Mini Project 7 -	Adding and working with records	
Mini Project 8 -	Creating and using a Hypertext link	
Mini Project 9 -	Creating and using multimedia fields	

Level 3 Major Project		63
Plan		
Scoring		
Input-Processing-Output		

Individual Cooperative	65
Project Guides	67
INPUT	- the research and planning for your project
PROCESSING	- critical thinking
OUTPUT	- the design of the project - Peripherals/Software
Major Projects Level 1 (examples)	69
Major Projects Level 2 (examples)	71
Major Projects Level 3 (examples)	73
Common Technology Words & Definitions	77

Notes

Time to Organize

To make sure you always have your information handy, it's a good idea to set up a filing system for yourself. The system can be hard copies (printed pages) and electronic files. Make sure that you always back up (save in two places i.e. the hard drive and a disk or CD) all of your electronic information. Ever heard of a computer crash! It's better to be safe than sorry so backing up your electronic files is a very good habit to start now!

Tech Buddy

Another good thing to do before you start is find a Tech Buddy. That person should know more about computers than you do. They should be someone that you can talk to, email, or telephone, if you have a question about one of your projects or about a piece of software. They should also be someone who agrees to your Internet Safety Plan (see pages 22-23).

- Step 1. Find a person who is willing to be your Tech Buddy
- Step 2. Show them your Internet Safety Plan and have them agree and sign it.
- Step 3. Start your mini projects!

Please fill in this chart with the information about your Tech Buddy. That way you will always know how to get in touch with them.

Tech Buddy
Name:
Phone:
Cell:
Email:

Know your computer

Before you get into the different computer applications it is important for you to understand what you have to work with. On your own or with some help from a parent, Tech Buddy or your Project Leader find and record the following information about the computer you will be using for your projects.

Platform (PC or MAC)	
Operating System	
Peripheral	
Peripheral	
Software	
Word Processing	
Spreadsheet	
Database	
Presentation	
Drawing	
Text Editor	
Video	
Audio
