

Dectomax Container Recycling Program

Pfizer Animal Health produces a product that is used for the treatment of internal and external parasites in cattle and swine called DECTOMAX. Pfizer has joined with 4-H for this fundraising effort for the betterment of our environment. DECTOMAX Pour-On containers are made of a high grade plastic that is not disposable however it can be recycled and made into products such as plastic fence posts, plastic lumber.

To register or obtain more information please contact:
