

Bulletin RUB 2005 – 02

September 1, 2005

Capital Cost Threshold Increase for Grant Purposes

The cost threshold for individual services will increase from \$15,000 to \$20,000 effective April 1, 2005 providing greater grant support for the more expensive services. This higher cost threshold recognizes the increase in costs to provide natural gas service to those consumers located on the fringe areas of a distribution franchise area or intensive farm operations that require greater supply capabilities.
