## **Activity 5**

## STOCKING THE CUPBOARD AND THE FRIDGE

STUDY QUESTION:

How many garden products can you find at home?

THE ACTIVITY:

In this activity children identify common garden products used

in their homes.

SUBJECT AREA:

Science

**CURRICULUM CONCEPTS:** 

LANGUAGE ARTS

Recognize words instantly: use phonic analysis.

Develop thought processes: classification.

**SCIENCE** 

Plants and animals: describe and classify plants.

**AGRICULTURE CONCEPTS:** 

Vegetables as food: food processing.

**PURPOSE** 

To introduce children to the process of classification (noticing)

differences and similarities of vegetables).

To give children the opportunity to further develop language

skills as they learn about vegetables.

MATERIALS REQUIRED:

Small cards, approximately 3 X 5 inches.

Garden products, fresh and processed.

TIME REQUIRED:

2 to 3 class periods.

## **PROCEDURE**

Part One

**Introduction** Ask children to name their favorite vegetable and draw a picture. Have children guess

Slide's favorite vegetable. Identify the turnip as his favorite. Then have children

identify the vegetables that have not been mentioned already.

Part Two

**Preparation** Identify categories of garden products such as vegetables growing above the ground,

vegetables or fruits cooked into a sauce and canned. Assign groups of children to bring

samples of each type of product for showing in class.

**Part Three** 

Classifying

**Reading Game** 

**Describing** As each child shows his or her product, write its name on a card or have the child label

the card. Put the products on the table and the labels into a hat or a box. Then let each

child retrieve one label, read it and find the item that goes with it. Have child rate the

product (Good — Excellent) according to nutritional value.

Part Four

**Conclusion** Sort the products or labels in various ways - e.g. fresh-processed; big-small, fruits,

vegetables; uses. Return briefly to the study question to note the many garden products

in our homes.

**FOR DISCUSSION** What kinds of things do vegetables give us when we eat them?

What can be made out of vegetables?

Do you think canned vegetables are as good as fresh ones?

 $EVALUATION\ STRATEGIES\ \ Have\ children\ write\ up\ the\ uses\ of\ their\ favorite\ vegetable\ and\ note\ the\ ideas\ and\ draw$ 

picture to go along with the information.

Have children write up a short ad that promotes their favorite vegetable.

## RELATED ACTIVITIES

- 1. Make a supermarket display or create a farmer's market.
- 2. Prepare an experience chart about the uses of garden products, as illustrated below:

Apples are used for <u>pie filling</u>.

Apples are used for \_\_\_\_\_.

Apples are used for \_\_\_\_\_.

3. Make salads during one class.
