

SURVEYS

OBJECTIVE: To assist Alberta Agriculture collect valuable information so that they may predict any foreseeable insect infestations or crop disease that may affect the economic viability of the County ratepayers.

1. A Blackleg of Canola Survey will be conducted yearly to monitor its' severity.
2. A part-time employee will be hired by the County if the need arises to conduct the Blackleg Survey or any other survey that the Agricultural Specialist or Agricultural Fieldman think is a priority at the time.
3. All surveys will be conducted during the proper time of year.
