

Section: A.S.B.	Page: Adopted: November 12, 2014 #512/14
Subject: DUGOUT LIMING	Control Code: 11.02

Purpose

The Agricultural Service Board through the Fieldman's office will provide a dugout liming service to assist in improving drinking water quality for livestock.

Definitions:

“Dugout Liming” means the application of hydrated lime (calcium hydroxide) for the reduction of algae growth, removal of phosphorous, and settling of silt in dugout water.

Policy Statement:

1. This service will be available as long as the conditions are acceptable and the hydro-seeder is not needed for other regular Agricultural Service Board Programs.
2. The producer will supply the hydrated lime and pay the full costs of hydro-seeder application.
3. The hourly application charges for the hydro-seeder to be established by the Agricultural Service Board and Agricultural Fieldman's Office and reviewed annually.
