# Dugout Construction Estimate Worksheet

This worksheet lists the items that a producer should discuss with a dugout construction contractor. A clear understanding between both parties is crucial so there are no misunderstandings or false expectations. Dugouts are far more than a deep wet hole in the ground. They are an important and significant investment for all farms. Dugout owners should take the time to ensure they understand what they are purchasing. A well-planned and constructed dugout will be well worth the investment.
