

Livestock Handling Equipment

Since 1974 Hi-Hog has offered a wide selection of premium quality livestock handling equipment and horse stalls.

As Canada's largest producer of livestock handling equipment our equipment can be found across the country. Our customers range from small hobby ranches to large corporate ranches. You will also find our equipment at veterinary schools, border crossings, auction marts, zoos and government facilities. Similarly, our box stalls and portable event stalls can be found in small private facilities to large, world renowned facilities like Spruce Meadows, Rocky Mountain Show Jumping and Thunderbird Equestrian.

All our products are designed and manufactured in Calgary, Alberta. Our focus is on providing outstanding quality in every item we make. We use high tensile North American steel in all our construction. In addition to using quality materials we also build our products for superior functionality, durability, and safety.

Our products are also designed for efficient and economical shipping. Our overseas orders are shipped by container. Our loading, sales and logistics staff are highly experienced with preparing loads to maximize the value of the load. To maximize your return on investment, we recommend you order full 40' containers.
