

## Dorper/White Dorper Sheep Genetics

Boda Farm has been raising South African Dorpers and White Dorpers since 1998. Our focus has always been on elite genetics and our selection of breeding stock consistently display top performance as well as strong exterior traits. Since our start with the Dorper breed, we have developed subsidiary flocks in Mexico and in Sweden.

Boda Farm specializes in international export of embryos and semen as well as live shipments. Our semen is collected in a federally-approved facility and all of our embryos are guaranteed to be of the highest quality according to the International Embryo Transfer Society grading system.

Boda Farm also offer international consulting for sheep management, reproduction and nutrition and have been involved in several international projects, including Mexico, Sweden, Kazakhstan and Mongolia.

Boda's flock is EU-certified and our genetics can be found in Mexico, Colombia, United States, Sweden, Norway, Finland, Vietnam, Trinidad and Tobago, Hungary, Czech Republic, Mongolia, Kazakhstan, United Kingdom and Jamaica.
