Organic Honey

Our family-run apiary in Guy, Alberta has been producing pure, organic honey for over 25 years. As leaders in sustainable beekeeping, Peace River Organic Honey is proud to offer the only honey certified as both organic and non-GMO. Our entire process, from hive to honey jar, is free from chemicals, pesticides and antibiotics.

As a True Source certified apiary, we can trace every delectable drop of our honey to the pristine Peace River region we call home. The area's cool climate and abundant fields of red clover and wild alfalfa create a honey that's delicately sweet and distinctively light in colour. Our honey is creamed rather than heat treated to preserve its subtle flavour notes and natural nutrients and vitamins.

Our 40,000 square foot processing facility is HACCP recognized with full production, packaging and distribution capabilities. We offer retail (500 gram jar) and bulk sales, bulk packaging and private label opportunities. We are Canadian Food Inspection Agency (CFIA) and Safe Quality Food (SQF) certified, ensuring the highest standards of food quality and safety. In addition to our organic and non-GMO designations, Peace River Organic Honey is also Kosher certified.

Peace River Organic Honey is our family's labour of love and we are thrilled to share it with pure-food enthusiasts around the world.
