

## Sulforaphane Skin Care, Supplements & Food

Newco Natural Technology is revolutionizing products using broccoli's most powerful antioxidant, sulforaphane. Over two decades dedicated to creating effective natural products.

**BroccoFusion™ Ointment** featured on the Oprah Winfrey Network, in May 2012 for skin tag elimination. This multi-purpose ointment can be used for treating skin conditions from hyperpigmentation, viral sores & psoriasis to burns & wounds, diabetic neuropathy, etc.

**BroccoFusion™ Lotion** is a moisturizer that protects against the drying effects of the sun and abuse of the elements, hides acne & skin blotches, smoothes wrinkles and brightens the skin.

**BroccoGen 10® Capsules** remains a staple product in health-food stores. Newco's potent sulforaphane antioxidant is a 3-day old broccoli sprout concentrate, extracted without the use of heat or harsh chemicals. One capsule is equivalent to 3 lbs of broccoli!

**BrainMaintain+™ Capsules** are a source of antioxidants, including sulforaphane, curcumin, resveratrol, alpha lipoic acid, ginkgo biloba, and yerba mate, to protect against free radical damage that plays a role in cognitive impairment.

**Brocco-Chocco™ Chocolate** is the world's healthiest chocolate. Made in collaboration with master chocolatier, Bernard Callebaut, each bar is made of 75% dark chocolate and contains 2-4 lbs. of broccoli sprouts.

Headquartered in Calgary, Alberta, Newco continues to create leading edge products.
