

Bovine Dystocia/Birthing Simulator

Veterinary Simulator Industries (VSI) Ltd. creates animal simulators that allow veterinary students to become proficient in their diagnostic and practical skills without the need to endanger or cause unnecessary discomfort to live animals.

The simulators are designed with a unique partnership between professional designer/fabricators and veterinary educators to create teaching tools that are realistic in appearance, highly functional, constructed of durable materials. They meet the needs of veterinary students and teachers, agricultural agencies and animal welfare specialists worldwide.

VSI Ltd. operates out of Calgary, Alberta, Canada.

Veterinary Simulator Industries Ltd.
