

Handcrafted Aromatic Bitters

Token Bitters makes handcrafted artisanal aromatic bitters, inspired by and made in the city we call home: Edmonton, Alberta, Canada.

Bitters are a potent flavouring agent made of concentrated botanicals such as aromatic herbs and fruits. Bitters are predominantly used as an additive to cocktails and can also be used to add flavor to non-alcoholic beverages, coffees, baked goods and more.

Token Bitters uses organic ingredients sourced from local farmers and businesses whenever possible. While sometimes we look outside the province for fruits that won't grow in the North, most of our bitters are made with plants grown fresh in Alberta under some of the highest standards in the world. The bitters are hand-made and bottled without chemicals or artificial preservatives.

Token Bitters come in 120 ml bottles and are offered in eight flavours (and counting!). Our box set contains four flavours in smaller 15 ml bottles, for convenience.

Sold direct to consumer or at food & beverage service establishments. No minimum/maximum order volume. Opportunities for white-labeling and unique SKUs.
