

Botanical Active Ingredients

Ceapro Inc. is a Canadian biotechnology company involved in the development of proprietary extraction technology and the application of this technology to the production of extracts and “active ingredients” from oats and other renewable plant resources. Ceapro adds further value to its extracts by supporting their use in cosmeceutical, nutraceutical, and therapeutics products for humans and animals.

Nature’s vitality underlies all of Ceapro’s products and determines every aspect of its character. The company fosters the natural and renewable. Our aim over the past decade of research has always been to provide entirely “green” and innovative functional ingredients to both the manufacturers of personal care products and the developers of therapeutics for human and animal well-being.

Ceapro has a broad range of expertise in natural product chemistry, microbiology, biochemistry, immunology and process engineering. These skills merge in the fields of active ingredients, biopharmaceuticals and drug-delivery solutions.

Ceapro Inc.
