

Timothy Hay

Supplying top Quality timothy hay as an optimal fiber source feed stuff specializing in the dairy industry. Timothy hay can serve as a complete feed or part of the ration for many ruminant applications including;

- Horse
- Calf Weaning
- Dry and Transition Dairy Cows
- Lactating Dairy Cows
- Heifers

Timothy hay is highly digestible, high in fiber, and low in potassium and nitrates.

We can offer double compressed mini-bale in bulk and stretch-wrapped style packaging. We are able to maximize ocean sea containers with 25,500 kg per container.

Our two Alberta forage processing facilities are HACCP certified and we operate under current Canadian Food Inspection Agency standards and protocols. Our timothy hay is Non-GMO and very often receives no herbicide or pesticide applications making it a very palatable, safe and natural type of forage feed.

Please let us know how we can serve your forage demands with our Canadian Timothy Hay!
