

Build your own grain safety demo!

Materials needed: 2 litre pop bottle; scissors; parent to help with cutting; clean grain such as canola, oats, barley wheat or popcorn; small toy figurine; empty container to catch the grain

DIRECTIONS:

1. Cut the bottom off of a 2 liter pop bottle.
2. Turn the bottle upside down with the cap on.
3. Fill the pop bottle with cleaned grain (canola, oats, barley, popcorn, etc)
4. Stand a small toy figure on top of the grain and remove the cap of the bottle, letting the grain flow into another container.
5. The grain will flow rapidly out of the jug, pulling the toy figure to the bottom.
6. Count the seconds it takes for the figure to be buried. In real life it only takes 3-4 seconds to become completely buried.
7. Show your family and friends the danger of flowing grain.

Show your friends and family the dangers of playing in grain!

Remember...

- Grain bins and gravity wagons are not safe places to play
- Don't play in piles of grain or in grain bins
- Never play or ride in grain wagons, grain trucks, bottom semi trailers or any type of grain or feed storage!
