

Farm Energy and Agri-Processing Program

Energy Assessment Providers

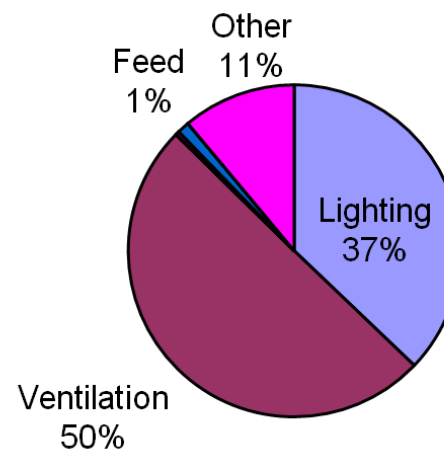

Subject to available funding, the Farm Energy and Agri-Processing Program will share costs with Alberta producers and agri-processors who have an energy assessment of their operation performed by an independent third-party assessor that is listed in this document, or otherwise pre-approved by the Program.

An energy assessment for your farm or processing facility will give you a breakdown of what exactly happens to the energy you purchase giving you more detail about input costs, and revealing areas of inefficiency. Some providers will include recommendations for how to improve efficiencies and what the payback will be on equipment retrofits. Recommendations from the assessments are often eligible for funding under the Farm Energy and Agri-Processing Program.

To apply for funding towards an energy assessment, fill out an Application form for the Farm Energy and Agri-Processing Program (use *Activity Code 500* of the form). If your Energy Assessment Provider is not listed in this document below, they will need to be pre-approved by the Program. They need to contact the Program at AF.FEAP@gov.ab.ca receive the submission criteria and process steps.

Remember that funding under the Program is not assured until you receive a Grant Approval letter.

If you are a provider of energy assessments and would like to be approved as an Energy Assessment Provider for this Program (to be added to this list), please contact the Program at AF.FEAP@gov.ab.ca for more information.

Approved Energy Assessment Providers
